9 JAN 1968

Gentlemen:

The subject Contract is for the design, fabrication, and delivery of four (4) Fibre-Optic Stereoviewers Model 552A. The last viewer (552A-104) was accepted as of 16 October 1967; however, on 8 December 1967, it was discovered that certain deficiencies exist in the objective transport system. Specifically, when the transport is in the coupled mode, at the highest zoom setting, the ratio of the Y axis to X axis objective speed is approximately 3.5:1 when it should be 1:1.

Inasmuch as these deficiencies were detected within the 90-day warranty period associated with this equipment, it is requested that you take whatever action necessary to correct the above-described problem. Your early attention to this matter will be appreciated.

Very truly yours,
